I am a person that gets inspired by what I likes, which has led me to the world of programming and development, I desire to continue learning, facing new challenges and applying my knowledge in a new working environment.

FEATURED PROJECTS

Meta

Brand Experience

Development of the Landing Page and Mailing system for an international Meta event.

Mondelez

Expert Academy

Development of a courses website, that segments users by types and gives them different accesses within the auditorium of the page along with trivias.

EXPERIENCE

Full-Stack Developer

5SEIS | Innovative Brand Experiences,
Jun 2022 - Present

Web development for multinational companies (META, Mondelez and Iveco) using various types of technologies (React, Angular, Vanilla and Splash), non-SQL database management (Firebase) and server configuration for projects (Instances, DNS zones and domains).

Back-End Tutor

CoderHouse, Jun 2022 - Oct 2022

Helping students in the classroom with the technologies seen in the class, correcting class work and participate in classes by providing examples and personal experiences on back-end development.
